

AUTOMATE, ACCELERATE & ACHIEVE

INTRO

Professionals working in the insurance sector are well-versed in the Insurance Policy Checking process and its legacy. It has been decades since the insurance sector performs the task manually. If you are an insurance specialist, broker, or underwriter, you must be familiar with how daunting, intricate, and time-consuming this manual process is.

“A recent survey has shown that checking and validating policies takes up about 40% of the working day for an insurance professional. It means manual policy checking takes about 30 minutes to 2 to 3 hours”,

Have you considered- why are we not automating this process already? Well, good news! We will discuss it here. But first, let's see how manual policy checking pushes you to losses.

MANUAL POLICY CHECKING

What All Is Wrong With This Process

Apart from consuming all your productive hours and making the process prone to errors. Enlisted are all the downsides of this system:

- Delayed delivery to clients
- Loss of productive hours = saturated staff potential
- No room for innovation or creativity
- Outdated method keeps you behind in the competition

These drawbacks undoubtedly can lead to hidden losses and slowed growth. Besides, no one likes to land in a lawsuit!

400X
faster delivery
to-market

152%
increase in
ROI

50%
reduction in
the workforce

Return on Investment

When you automate the policy check process with our solution, you will experience about a **90% reduction** in cost for the first year and it nearly doubles to about **152%** from there after.

To sum up

Manual policy checking is quite outdated and your competitors have already moved to automated, digital solutions. If you're still stuck with the old-school approach, it is time to press the refresh button and improve the entire process of policy checking.

Tech Tammina's Policy Check Automation Solution will help you stay a step ahead of the competition and make the process cost-efficient, fast, and error-free.

We were impressed by the platform's capabilities and its capacity to quickly and precisely collect and synthesise the data we required for Policy Check.

The application's key feature is its flexibility, which enables highly customizable workflows to meet our daily business needs and dramatically shortens process times. It also connects with other systems with ease.
